EDUCATION

University of Birmingham

BSc Artificial Intelligence and Computer Science (2:1 Classification)

2021 – 2024

Birmingham, UK

EXPERIENCE

Chief Information Officer (CIO)

Man.I.T LLC

August 2024 – May 2025

Remote (Colorado, USA)

- Spearheaded end-to-end **technical architecture** for a startup platform connecting small businesses with developers
- Led a **cross-functional engineering team** of students on **full-stack development** projects
- Built and deployed **3 SaaS platforms** adopted by 6 businesses during the beta roll-out
- Implemented **multi-tenant cloud infrastructure** on **AWS** and **GCP**, supporting concurrent client usage
- Developed **CI/CD pipelines** with **GitHub Actions** and **Docker**, improving release speed by 30%
- Conducted **client discovery calls** and **technical consultations**, converting over 75% of leads into users
- Established **RBAC** and **GDPR-compliant security strategies**, increasing client trust

Freelance Web Developer

Self-Employed

October 2024 – Present

Remote (UK & International)

- Delivered 25+ **full-stack websites** for small businesses in the UK, US, and Europe with a 4.75/5 average rating
- Built responsive apps with **React.js**, **TypeScript**, and **Tailwind CSS**, achieving 40% faster load times
- Integrated secure **Django authentication systems**, reducing access-related support tickets by 70%
- Automated deployments using **GitHub Actions**, cutting average deployment time by 35%
- Utilised **PostgreSQL** and **MongoDB** for efficient data storage, boosting retrieval speed by 35%

PROJECTS

Hybrid Stance Detection for Tweets | Python, Scikit-Learn, XGBoost, TF-IDF

June 2023 – December 2023

- Engineered an **ML pipeline** achieving 87% test accuracy for Twitter misinformation detection with 100s latency
- Integrated **Google Search API**, **NLP**, and **XGBoost**, reducing manual verification time by 80%
- Built scalable **web scraping** tools using **Playwright** and **BeautifulSoup** for multi-URL analysis
- Developed an evaluation framework with **performance metrics** for custom URL stance detection

AI Shopping Assistant | React, TypeScript, Python, Flask, Google Gemini API

June 2025 – July 2025

- Developed an **AI-powered engine** managing 10+ product categories with real-time data and user profiling
- Implemented a **context-aware suggestion system**, reducing product search time by 70%
- Built a scalable **full-stack system** with a React front-end and Flask backend
- Created a responsive UI with **multilingual support** and secure **API integration**

Virtual Mouse Control System | Python, OpenCV, MediaPipe, PyAutoGUI

July 2025

- Created a **touch-less interaction system** with real-time **gesture recognition** at 30+ FPS
- Implemented 5 **gesture controls**: cursor movement, clicking, and vertical scrolling, no hardware required
- Developed a multi-finger **tracking algorithm** using **MediaPipe**, achieving over 95% gesture accuracy
- Built an **accessibility-ready tool** for multi-monitor Windows setups with DPI scaling support

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript, Java, SQL, HTML/CSS

Frontend: React.js, Tailwind CSS, Next.js

Backend: Node.js, Django, Django REST Framework, Flask, REST APIs

Databases: PostgreSQL, MongoDB, Firebase, MySQL

Cloud/DevOps: AWS, Google Cloud Platform, Docker, GitHub Actions, CI/CD

AI/ML: TensorFlow, PyTorch, Scikit-Learn, XGBoost, NLTK, OpenCV, MediaPipe

Tools: Git, Heroku, Netlify, Jupyter Notebook, VSCode, Postman

ACHIEVEMENTS

Scored **90%** (class highest) on **team project module** through **collaborative development** and **coordination**

Elected as **Student Representative** at University of Birmingham, bridging student-faculty communication
